## GEID Generators

- GEID generators are very compact. Their compact design allows them to be placed in confined spaces. These generators have a unique operating and control features. Hydraulic motors are included.

## Control Panels

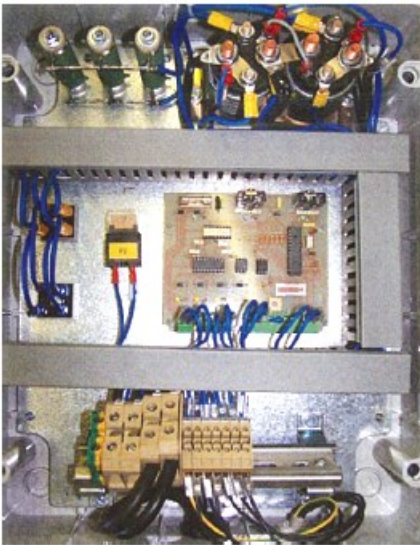

*CED 12/16EL Control Box*

- CED Control panels are used with the GEID Generators. This design eliminates the traditional control boxes. Zanetti's control panels are about 18 inches wide by 22 inches tall, allowing them to be placed almost anywhere on a machine.

Generator	Battery Voltage	Control Panel
GEID 5	12 or 24	CED 24/16R
GEID 7	12 or 24	CED 24/16R
GEID 8	24	CED 24/25R
GEID 12	24	CED 24/25R
GEID 16	24	CED 24/25R
GEID 20	24	CED 24/25R
GEID 25	24	CED 24/25R

ESB Control Panel

- ESB control panels are designed for the battery operated magnets. The ESB panels are available in 12 or 24 volts. The panel utilizes a solid state control board that simplifies the control panel. The panel also contains heavy duty filters and fuses which protect the control box and machine.
