

Excavator Track Pads (Polyurethane & Rubber)

Eliminate grouser wear, surface damage, reduce noise and increase traction.

Moley Magnetics, Inc. is a proud distributor of Cushotrac® Polyurethane and Rubber Excavator Track Pads.

Cushotrac® rubber and polyurethane Track Pads are designed for all types of crawler equipment: cranes, dozers, excavators, grinders, milling machines, pavers, planers, and trenchers. Cushotrac® Track Pads eliminate grouser wear, eliminate surface damage, reduce noise and increase traction. We also manufacture Cushotrac® SOLID rubber outrigger pads that are available for virtually every backhoe loader on the market today.

Five mounting designs are available: Patent Pending Clamp On™, bolt to link, bolt to plate, mold-on and bolt to grouser. Moley has prints and molds for virtually every make and model of tracked equipment in the field.

- 100% Work life guarantee.
- Maximum cut, tear, and abrasion resistant rubber and polyurethane raw materials.
- Mechanical bond complements chemical adhesion for guaranteed lifetime work life of Cushotrac® Track Pads.
- Grouser shoe exchange for mold-on Cushotrac® Track Pads.
- Specialty compounds include wire impregnated rubber for severe application and 85A & 95A durometer(hardness) polyurethanes.
